*BEAUTIFUL DESIGN  
is in our nature*

**CDK NATURAL STONE**

---

For over 30 years, CDK Stone has been visiting the world's finest stone quarries to source the most beautiful natural stone on the planet.

Our extensive travels and unmatched standards continue to discover new sources of unique natural stone to give Australian buildings a design that's as individual as it is beautiful.

Our superb range of marble, travertine, limestone, granite and exotic stones can be supplied in slabs, tiles or cut-to-size panels to match any residential or commercial application.

We also supply the most comprehensive range of stone working tools, equipment and machinery in Australia.

We invite you to visit one of our showrooms in Melbourne, Sydney, Gold Coast, Perth or Auckland to discover that truly beautiful design is in our nature.

## MARBLE

Marble has been used since ancient times for sculptures and buildings. Its beauty, uniqueness, luxury and imperfections are what make marble such a sought after product in today's designer market. You will also find that Italian marble has been used for kitchen benchtops and vanities for centuries. Bread is kneaded, pasta is made, marble bench tops are used and cherished for their natural beauty and characteristics.

## TRAVERTINE

A form of limestone suitable for a variety of applications. One of its most infamous uses was to build the colonnade of St Peters Basilica in Rome, Michelangelo also chose Travertine as the material for the dome of St Peters Basilica.

In today's world there is an immense variety of travertine available from many different countries. The scope of where Travertine can be used includes, flooring, wall panelling, benchtops, vanities, paving and coping.

## GRANITE

Granite is the signature rock of planet earth. It is a strong stone with very distinctive characteristics such as high polish and is resistant to acid and weathering. Granite has been a pillar of strength throughout centuries and current design trends include exotic granites sourced from various countries such as India and Brazil.

## EXOTIC

Individualising home décor with exotic natural stone is a growing trend amongst architects and designers. Exotic stones can bring unique beauty to kitchens, bathrooms, bars and fireplaces. Blending different stones and working with both honed and polished surfaces can make any application a piece of artwork.

# OUTDOOR

Naturally, the Earth's stone is highly durable against weather conditions. As a result, several varieties are ideal for outdoor paving. The texturing of stone also reduces slipping, which combines functionality with its ingrained character. CDK's range of natural stone can be used in a vast amount of outdoor applications such as pool surrounds, balconies, walkways, driveways, BBQ areas, stairs and gazebos.

Cabinetry: Western Cabinets

NEW MATERIALS THAT DEFINE THE FUTURE OF CONSTRUCTION

NEOLITH is the perfect solution for all residential and commercial surfaces with exceptional durability and aesthetic appeal. NEOLITH slabs are available in three thickness's suitable for both work and leisure surfaces and any cladding applications, including furnishings, shop fittings, display fittings, cupboards, doors, walls and floors.

NEOLITH can be used for furniture, shop fitting and display cladding providing multiple colour options and combinations. The exciting possibility of an entirely holistic look where the furnishings, fittings, work surfaces, floors and walls are all of the same material and even the same colour.

NEOLITH is perfect for wall and floor cladding because of its large slab size. It can easily be cut into any panel size to suit the project being worked on. The 12mm gauge makes it light-weight, easy to handle and does not require additional reinforcement of the sub-surface to carry the extra weight of the cladding. The durability of NEOLITH and the minimal number of seams required because of the large panel size make it an extremely hard-wearing material, ideal for high traffic commercial areas and residential homes.

NEW STATE-OF-THE-ART PRODUCTS COMBINING FUNCTIONALITY + BEAUTY

APPLICATIONS

The infinite options of colour combinations and finishes create exceptional and unique spaces. Perfect finishes. Suitable for direct contact with food, waterproof and easy to clean.

LIGHTWEIGHT, RESISTANT AND VERSATILE

The size of our slabs makes NEOLITH the perfect solution for large surfaces, with fewer joints and excellent mechanical properties. Easy to transport, handle and install. Resistant to bending and wear and tear. Resistant to fire and high temperatures without giving off any toxic fumes.

FACADES

One of NEOLITH's main uses is for ventilated facades and curtain wall applications thanks to its lightness, resistance to atmospheric agents, colour resistance with no pigment deterioration, and its large dimensions, which facilitate rapid coverage of the whole surface area. NEOLITH comes in a wide range of colours for different styles of facades.

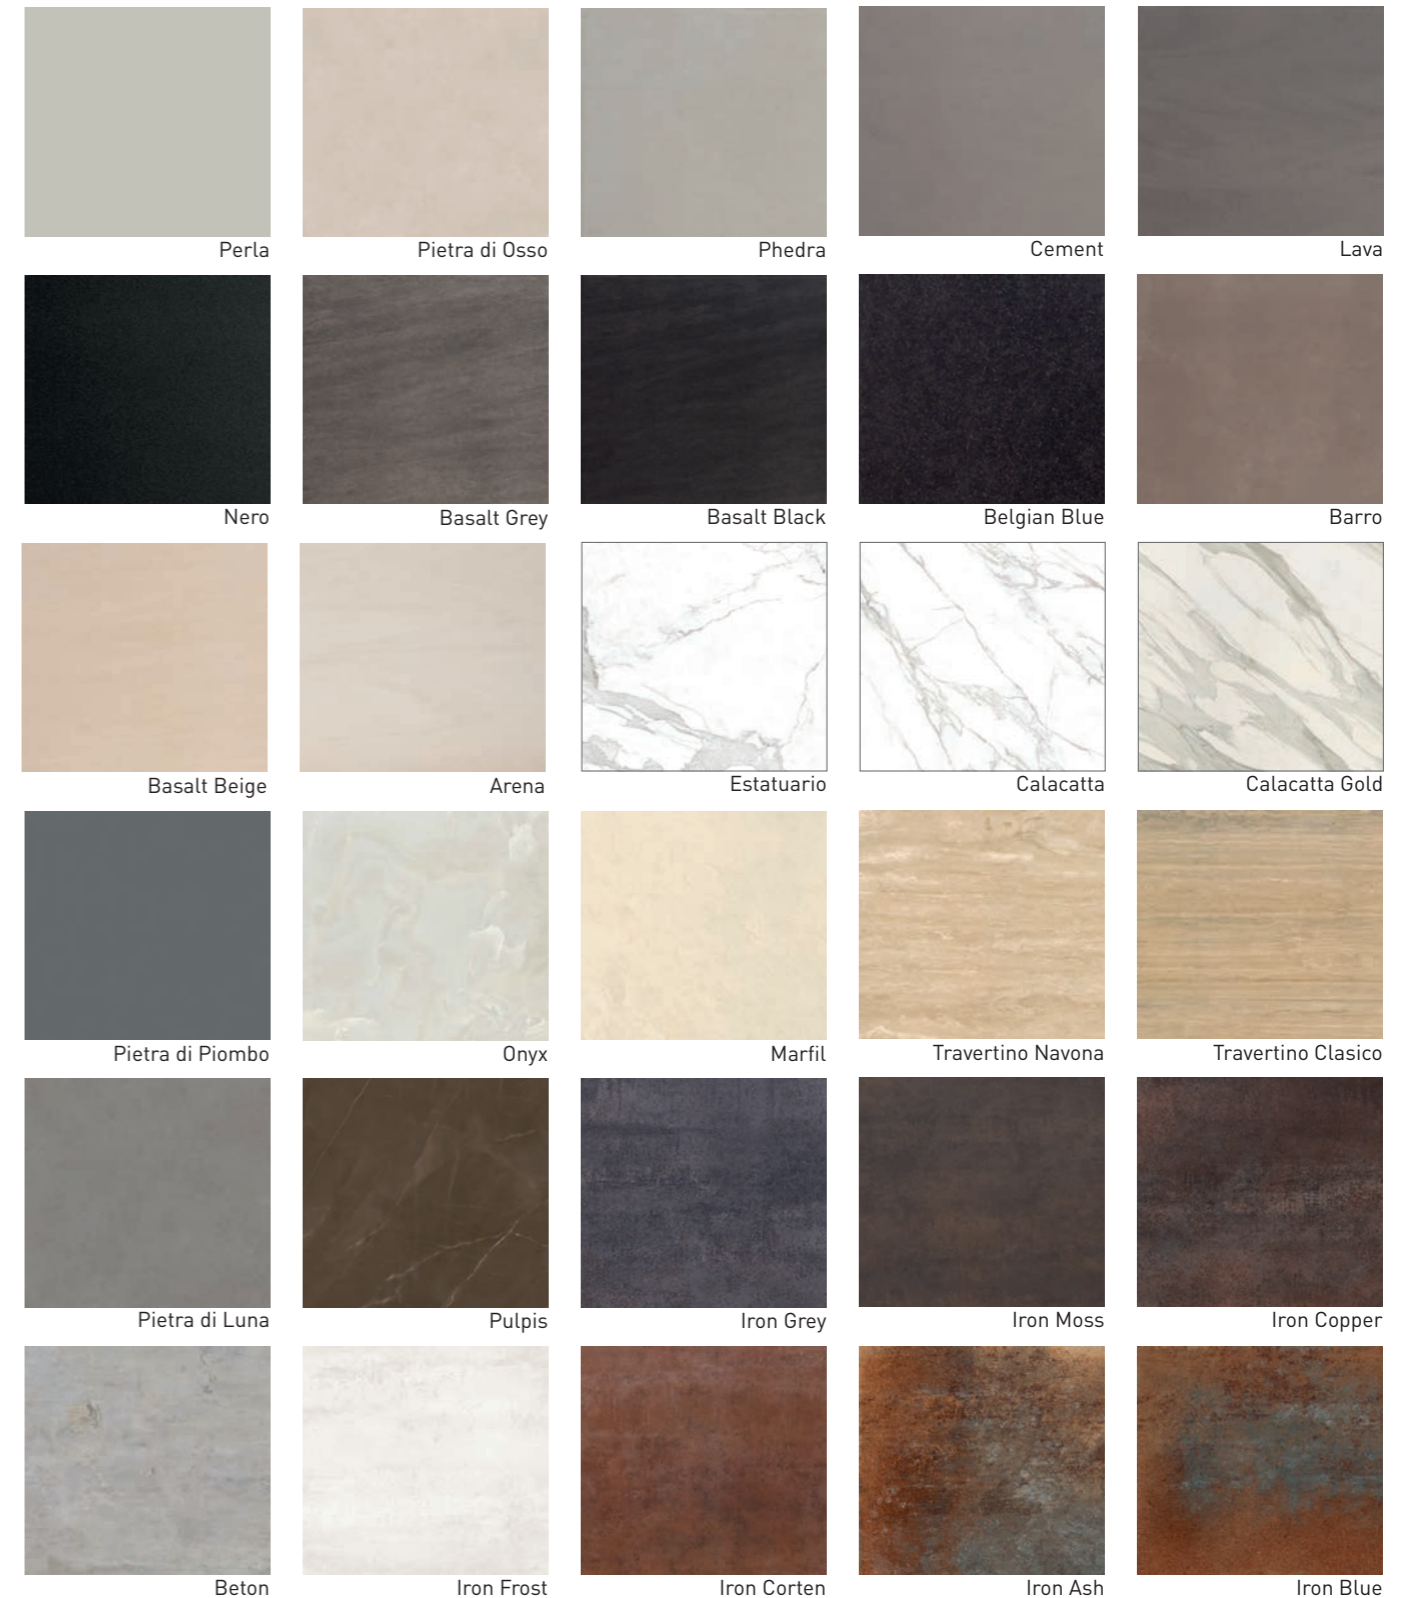

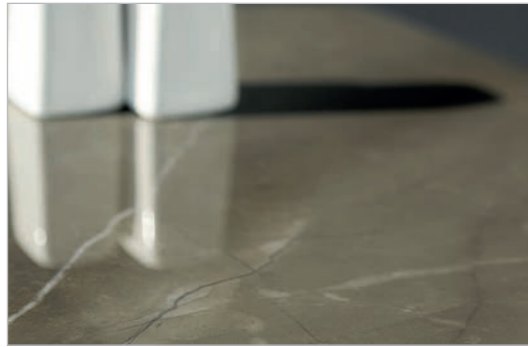

THE NATURAL CHOICE

NEOLITH emerged from the evolution of treatment processes of construction materials. NEOLITH combines the finest raw materials with the most advanced industrial technology. NEOLITH is 100% eco-friendly, using natural materials and technologies that respect the environment.

NEOLITH obtains its colours from 100% natural pigments that withstand the passage of time. NEOLITH is entirely made up of natural clays, feldspar, silica and mineral oxides.

Imagine NEOLITH in your home providing avant-garde designs and aesthetics. The infinite options of colour combinations and surfaces create exceptional and unique spaces with a perfect finish.
