

NEOLITH[®]
SINTERED STONE

SLAB COLLECTION 2019

PROUDLY BROUGHT TO YOU BY CDK STONE

a new way of thinking about shapes & spaces

Transforming imagination into functionality, Neolith is the premium fashion stone. Imported directly from Europe, Neolith synergises the utmost design principles with functionality, resulting in a scratch, stain and heat-resistant surface. Made to the highest international standards, Neolith is available in a wide range of styles and textures and is suitable for the most demanding applications.

After years of research and innovation, Neolith is a testament to technological development. Consisting of all natural raw materials, compacted under immense pressure, Neolith's technology is unprecedented in the construction industry. As a result, Neolith is the new superior standard in surfaces.

Neolith slabs are available in four thicknesses, 3mm, 6mm, 12mm and 20mm. Neolith is available in over 50 styles with designs that draw inspiration from around the globe. With four finishes available, you can create your own exceptional and unique design.

Aside from its natural beauty, Neolith is 100% eco-friendly using natural materials and technologies that respect the environment. Neolith combines natural materials such as clays, feldspar, silica and mineral oxides with 100% natural pigments to create this unmatched Sintered Stone.

BENCHTOPS & BATHROOMS

Being scratch, stain and heat-resistant, as well as, easy to clean and impervious to chemical cleaning products, Neolith is ideal for use on kitchen benchtops & bathroom vanities. Adding a touch of elegance to every design, Neolith has a wide range of styles and finishes to suit every home.

FLOORS & WALLS

Neolith's large sizes create a uniformed look across floors and walls. Due to its durability, Neolith is an extremely hard-wearing material that can withstand heavy foot traffic areas and abrasions.

FACADES

Due to its resistance against temperature, atmospheric changes and UV-fading, Neolith is ideal for ventilated facade systems and curtain wall applications. With so many colour combinations and continuous styles, this Sintered Stone creates an impressive facade solution.

SURROUNDS, FEATURES & FURNITURE

Neolith's applications are truly endless, with other common applications including BBQ areas, fireplaces, feature walls, furniture, cabinetry cladding, pool surroundings and more.

COMMERCIAL & RETAIL

Combining durability with beauty, Neolith is perfect for commercial applications such as shop fittings, displays, bars, stairs and large scale floors.

BOOKMATCHING

A range of Neolith styles are also available in a reversed design, meaning a bookmatched design can be achieved. Bookmatching is the practice of matching two stones together so they mirror each other - giving the illusion of an open book. This effect is perfect for continuing Neolith's veining or natural grain.

THE NATURAL CHOICE

Due to its wide range of applications, Neolith is the natural choice. It combines the finest raw materials with the most advanced industrial technology. With styles that pay homage to Natural Stones, Cement, Timbers and other timeless materials, Neolith reverberates a natural beauty. With a 10 year warranty on benchtops, Neolith is the ideal surface for your next project.

NEOLITH BETON FEATURE WALLS + FLOORING

 **SCRATCH RESISTANT**
Resistant to scratching and abrasion due to the hardness of the surface.

 **RESISTANT TO HIGH TEMPERATURES**
Does not burn in contact with fire or let off smoke or toxic substances.

 **RESISTANT TO UV RAYS**
Does not deteriorate from exposure to the sun or extreme temperatures.

 **EASY TO CLEAN**
Resistant to chemical cleaning agents.

 **WATERPROOF**
An absorption level of near zero makes it resistant to stains.

 **SUITABLE FOR HEAVY TRAFFIC**
Due to the hardness of the surface.

 **RESISTANT TO ICE AND FREEZING**
Neolith is not damaged by low temperatures.

 **HYGIENIC**
Completely suitable for contact with food. Does not release harmful substances.

 **100% RECYCLABLE**
Up to 52% of any Neolith slab is comprised of recycled raw materials.

 **100% NATURAL**
Resin-free. Does not release any harmful substances into the environment.

 **LIGHT**
The 3mm slab is only 7kg/m² and the 12mm slab is 30kg/m².

Now available in four different finishes

SATIN

Neolith's original finish is characterised by its natural matte look and a slightly textured feel.

RIVERWASHED

Neolith's Riverwashed finish is compared to a bush hammered or aged finish and adds a touch of realism to Neolith's range.

SILK

The Silk finish is much softer to the touch. The smooth nature of the surface is achieved through Neolith's Airless Pistol [NAP] technology.

POLISHED

The Polished finish adds shine, depth, and a reflection that stands out through its complete flatness and a touch of elegance.

Neolith Sintered Stone | Size & Thickness

3mm is ideal for use as indoor furnishings in bathrooms, kitchens and on furniture such as tables, wardrobes/closets, doors and office partitions. This thickness is ideal for refurbishment projects. Being so thin, it can be placed directly on the existing surface without the need to extract, helping to reduce project execution times, costs and waste in landfills.

6mm is ideal for use in flooring, walls (both indoors and outdoors), stairs, pool surrounds and exterior facades.

12mm is ideal for kitchen and bathroom benchtops. This size allows for better utilisation of the surface, as well as reduced waste. For instance, one large slab can be utilised for two full average sized benchtops.

20mm is ideal for kitchen benchtops. Inspired by a growing demand among designers and specifiers for thicker kitchen benchtops.

Please speak to your Sales Consultant for available colours, sizes, thicknesses and finishes.
