TERRA LEVEL

With this pedestal a balancing or decrease of the slope and a levelling of irregularities e.g. outflows, weld seams and much more is possible. The desired height or slope compensation is achieved by stacking the pedestal in 1cm increments. The fine leveling can be made separately in 1 mm increments on every corner of the slab. This ensures that the slab lies strong and full.

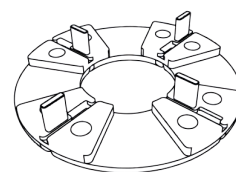

A variable mm-construction of every slab corner ensures:

- an individual slope compensation
- a levelling of irregularities e.g. weld seams
- a levelling of variable slab thickness

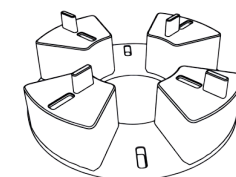

Terra Level 1 cm (stackable)

Terra Level pedestal 1 cm can be layed on every sealing foil. The very tough special plastic does not harden and reduces footfall sound. TERRA LEVEL pedestals are stackable and the system allows an adjustment from 1 cm up to 20 cm.

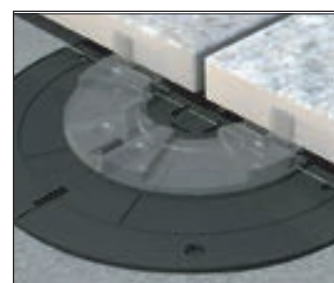

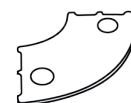

Terra Level block 3 cm (stackable)

Terra Level block 3 cm was constructed to save time and costs. The bloc can be used from a minimum raising height of 5 cm and has to be completed at the top and the bottom by TERRA LEVEL 1 cm to guarantee anti-slipping conditions.

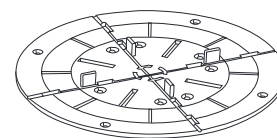

Terra Level adjusting-shim 1 mm (stackable)

Terra Level adjusting-shim 1 mm allows easy levelling. Different slab thicknesses, irregularities of the underground as well as a slope can be adjusted on every corner of the slab.

Terra Level DVP pressure dispatcher disc 3mm (Ø 20cm)

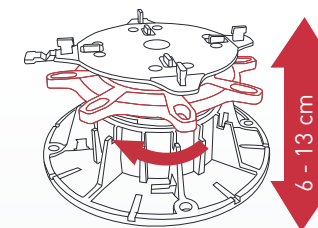

The DVP pressure dispatcher disc 3mm can be combined with TL1, TL2 and TL3. This achieves a larger support surface of 20 cm diameter.

TL4 tile support 6 cm to 13 cm

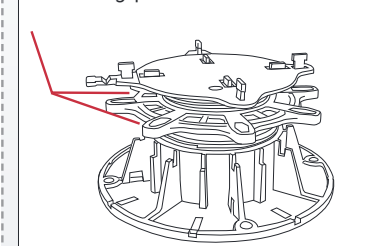

TL4 tile support 6 cm to 13 cm is adjusted by means of an adjustment ring. If necessary, fine adjustment and slope compensation is completed along with the TL3 adjustment shims 1 mm. For raising heights just over 13 cm, TL1 tile support 1 cm can also be used for the construction.

TL4K coupler 7 cm

TL4K coupler 7 cm can only be used in combination with TL4 - unscrew the base plate at TL4 and insert the coupler. The height regulation of 7 cm can be adjusted as in TL4 by the central adjustment ring. This achieves a raising height of 13 to 20 cm.

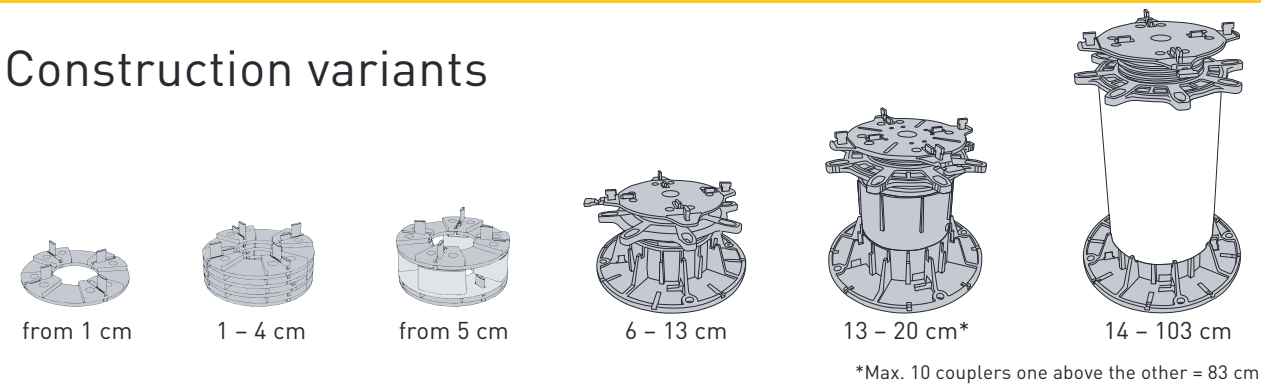

It is also possible to use several couplers (maximum 10). Raising height of 83 cm possible. TL4K was designed to speed up working processes and save costs.
